

INTEGRATE YOUR ERP SYSTEM WITH PROCURIFY

Procurement Made Ridiculously Easy

Procurement doesn't have to be complicated. So many business software solutions are overly complex and come with expensive price tags. Most organizations don't need something that can do everything - just something that is easy to use and gets the job done.

They need **Procurify**.

Procurify ensures an efficient and streamlined workflow.

REQUESTING:

- Staff makes simple requests in Procurify when the need to buy something arises.
- Staff can pick and choose from easy-to-locate, predefined items within Procurify's catalogue feature.

APPROVING:

- Managers are notified immediately when both orders and expenses are submitted.
- Based on how your company's approval routing is structured, you can place a limit on how much a manager can approve, which eliminates any rogue spending or over-paying for products.
- For example, if a purchase for more than \$100 is made, you can structure your approval process so that a senior manager must make the approval.

PURCHASING:

- All purchase requests are consolidated into one intuitive purchasing list.
- That master list gives the buyer/purchaser the ability to bundle purchases together efficiently into one purchase order.
- Purchase orders can then be immediately sent to suppliers via email.

RECEIVING:

- Items get shipped from the applicable suppliers.
- Items, once received, get sorted according to their inventory IDs.
- Sorting by inventory ID ensures an accurate count of items, every time.
- Any deficient items are also caught and recorded immediately, every time.

INVENTORY:

- Records and stores all items on-hand.
- Keeps track of all items on order.
- Allows items to be re-ordered immediately if low on stock.

Try it out for free for 14 days with full Email, Phone and Web Support!

Procurify is a fully featured e-Procurement solution.

Procurify streamlines the entire procure-to-pay cycle. From requisitions to purchase order creation, from approval routing to item catalogues and tracking, your organization's spending can be managed efficiently in the Procurify system. Because Procurify is a cloud-based software, you will have access to the software wherever you have Internet connection.

Procurify will continue to uphold its vision to deliver a **simple, affordable** and **well-designed** business software that reduces reliance on paper.

Benefits of Procurify:

- ✔ Real-time analytics
- ✔ Real-time tracking
- ✔ Mobile purchasing
- ✔ Electronic purchase order
- ✔ Budget control
- ✔ Electronic expense and travel management
- ✔ Approval routing
- ✔ No contracts
- ✔ Full phone, email and web support

The Procurify Way

Save Time

Procurify **dramatically reduces approval times** and **cuts down on bottlenecks in the process chain**. As a web-based solution Procurify can be accessed anywhere you have Internet connection. You can approve or deny requests on-the-go, freeing up your team's valuable time.

Procurify **significantly reduces paperwork**. Every step of the procurement cycle is electronically tracked and automatically archived. This allows critical details to be quickly and conveniently accessed when it comes time for reporting or to do an audit.

Save Money

Procurify **reduces operating expenses** by decreasing "maverick" or rouge spending. The system makes it easy to order from preferred suppliers and take advantage of vendor discounts. Procurify also allows users to match purchase orders to invoices, which helps **prevent double orders or payments** made for unordered goods and services. Having complete visibility to track approved orders and the dollars spent will lead to substantial savings.

No hidden fees! Upgrades are free of charge and automatic.

Learn Quickly

Procurify is easy to learn and will be **fully implemented in 7 days**. In one week, you get 100% visibility into your company's spending!

WHY THEY LOVE US

asco

"Before Procurify we had a very ad hoc system it wasn't really organized. We were using our ERP system to try to track down orders. The whole tracking system was very complicated before implementing Procurify."

Rodrigo Artunduaga
Project and Materials Manager
